Art Unit: 3723

1. Claims 1, 2, 4, 6 and 13-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 5, "the other-side" lacks antecedent basis.

In claim 6, lines 21-24, "when fluid pressure is supplied to the tire chamber...and preventing relative rotation ..." is misdescriptive since fluid pressure supplied to the tire chamber does not prevent relative rotation between the rim sections. Fluid pressure supplied to the expanding means prevents the relative rotation between the rim sections.

In claim 6, line 21-22, "the tire chamber" lacks antecedent basis.

In claim 13, lines 15-19, "when fluid pressure is supplied to the tire chamber...and preventing relative rotation ..." is misdescriptive since fluid pressure supplied to the tire chamber does not prevent relative rotation between the rim sections. Fluid pressure supplied to the expanding means prevents the relative rotation between the rim sections.

In claim 13, line 16-17, "the tire chamber" lacks antecedent basis.

In claim 14, lines 22-25, "when fluid pressure is supplied to the tire chamber...and preventing relative rotation ..." is misdescriptive since fluid pressure supplied to the tire chamber does not prevent relative rotation between the rim sections. Fluid pressure supplied to the expanding means prevents the relative rotation between the rim sections.

In claim 14, line 22-23, "the tire chamber" lacks antecedent basis.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 13 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Folta (5259242).

Inflation of the tire of Folta provides for the function of the fluid pressure as broadly claimed by applicant. Folta discloses claws or a bayonet type connection (col.5, lines 15-30).

4. Claims 1, 2, 4, 6 and 14 may be given favorable consideration if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. Claims 3 and 5 are allowed.

6. Claims 7-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention. Applicant must cancel claims 7-12 prior to allowance.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3723

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Applicant's arguments filed June 6, 2007 have been fully considered but they are not persuasive. Applicant's arguments are moot in view of the new ground(s) of rejection set forth, above.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to D. Meislin whose telephone number is 571 272-4487.
